RECENT STATE CHAMPIONS IN EACH EVENT

(NOTE: Current State Record is in Bold)

Prior to 1994, times were handheld and, by rule, were rounded up to the next nearest tenth of a second. When Fully Automated Timing (FAT) was incorporated into the state tournament, times could accurately be measured to the hundredth. For state record conversion, the NFHS rules book determined that the difference between a handheld time and automatic time is 0.24 seconds. The old handheld time would be compared to the result with the FAT time by adding this .24. If the recent FAT time is faster, it will then be accepted as the new state record.
